## **Conditions of Sale.**

Vendors and Purchasers are reminded that H&H have advised the Society that all stock is sold in accordance with The Livestock Auctioneers' Association Ltd conditions of sale for all sales of livestock at all livestock auction markets and every Vendor, bidder and Purchaser shall be deemed to have full knowledge of these Conditions and by taking part in the sale agrees to be bound by them. Vendors and Purchasers are advised therefore to familiarise themselves with the conditions as recommended for use by The Livestock Auctioneers' Association Ltd (Revised August 2017). Please note that the Ryeland Flock Book Society provides no warranty, and none shall be implied, as to title, description, or the quality of any Lot. The Ryeland Flock Book Society shall not be liable to the Purchaser in any respect for any defect of title, error of description or imperfection or for any announcement or statement concerning any Lot offered for sale whether made orally or in writing (whether in a sale catalogue, order of sale, advertisement for the sale or otherwise) and whether given before, during or after the sale, nor shall the Ryeland Flock Book Society Ltd incur any liability in relation to any dispute between a Vendor and Purchaser. For the avoidance of doubt please be advised that the Ryeland Flock Book Society shall not become involved in any dispute between a vendor and purchaser.

The Ryeland Flock Book Society draws Vendor and Purchasers attention particularly to the following extracts from The Livestock Auctioneers' Association Ltd conditions of sale for all sales of livestock at all livestock auction markets:

### **Ram Fertility**

- Vendors must warrant that any ram sold as a stock ram is capable of natural service. This is a 10 week warranty.
- Where there is doubt over a ram's fertility, purchasers should contact the auctioneers in the first instance.
- If a purchaser can prove a breach of warranty, the purchaser may return the ram to the vendor who shall, at the purchaser's option, either replace the ram with another ram of equal value which is capable of natural service, or refund the purchase price together with such other costs and charges as the purchaser may be entitled to.
- For the avoidance of doubt, if the purchaser is able to obtain a viable semen sample from the ram for use by artificial insemination he shall not be entitled to any claim against the vendor for breach of warranty.
- Notice of a claim must be supported by a Veterinary Surgeon's certificate confirming that the ram's inability, incapacity or ineffectiveness is not the result of injury, illness or accident occurring after the time of the sale and the purchaser's breeding stock are not responsible for the ram's inability, incapacity or ineffectiveness.

## **Animal Health Guidance for Vendors**

### **Management of suspected cases**

- Any animal or group of animals suspected of exhibiting signs of illness, infection or infectious disease to be rejected/quarantined pending veterinary inspection by the named veterinary officers. The veterinary officer's opinion is final and conclusive.
- If infectious disease is suspected then the whole batch to be quarantined pending veterinary surgeon inspection.
- Two options for quarantine: i) move to isolation pens in mart which are located away from all stock and people traffic to prevent potential spread of infection. Ideally this should be outside the airspace where sale animals are penned (location of these pens to be agreed with mart). ii) Return sheep into livestock trailer they arrived in until veterinary inspection.
- If on hand, veterinary officer to inspect sheep immediately whilst in the steward's enclosure.
- If such sheep arrived in mart in shared livestock trailer then ALL sheep in that trailer to be quarantined.
- The Veterinary Officer(s) is authorised to refuse permission for any such sheep or batches to be admitted into, or to have removed from the sale. The owner of such animal(s) may obtain a certificate from RFBS stating the nature of the disease or infection.
- Evidence of an attempt to conceal disease will result in disqualification from show and RFBS disciplinary action.
- Any costs relating to materials, drugs used to treat animals is responsibility of owner/agent.

### **Steward Biosecurity**

- Mart to make available suitable DEFRA approved disinfectant for personal cleansing and disinfection and, where necessary, wash floor of inspection area.
- Stewards should wear wellingtons and waterproof over trousers.
- Disposable gloves to be made available for use by stewards and other personnel when handling suspect sheep.
- A suitable disinfectant hand wash for stewards and personnel.
- Paper towels to dry hands.

A selection (not exhaustive) of type of signs that raise suspicion of infection, illness or infectious disease:

- Animals shouldn't be allowed in if they show signs of any fluid or other discharges eg eyes, nose, mouth, diarrhoea, vulval discharge, mastitis (swollen udder, uneven quarters) , discharging skin wound, open wounds, infected cuts.
- Skin conditions – wool loss with lesions, scratching, rubbing, crusts, abscess, discharging lesions (wounds etc), growths. Example conditions : Sheep scab(!), ringworm (zoonosis) but uncommon sheep), Orf (zoonosis), CLA (contagious lymphadenitis) which is contagious skin infection, skin/lymph node abscess of sheep, lice, active fly strike, other parasites (eg ticks).
- Lameness – Scald, footrot, CODD (contagious ovine digital dermatitis). In practice DO NOT allow lame sheep into show and sale.

- Pneumonia – coughing, abnormal breathing (not to be confused with travelling in hot trailer).
- Eyes – cloudy eyes, redness, discharge, pain, not opening eye(s).
- Any local further actions to be on basis of veterinary advice eg sheep scab where suspicion contact with stock of other vendors.
- Of course, responsible owners will be vigilant in inspecting their sheep thoroughly prior to travel to show and sale.

#### **Genetic Testing Results : Disclaimer**

White fleeced Ryeland sheep have the ability to produce coloured fleeced Ryeland sheep due to the expression of a recessive coloured gene. Not all white fleeced Ryelands carry the recessive coloured gene. When they don't, they are referred to as homozygous (WW) and cannot produce coloured fleeced lambs. White fleeced Ryeland sheep that carry the coloured recessive coloured gene are known as heterozygous (WH) and can sometimes produce coloured fleeced lambs if mated with another heterozygous Ryeland. The Society offers members a genetic testing service, carried out by Cardiff University, to test white fleeced Ryeland sheep to determine if they have the genetic ability to produce coloured fleeced lambs. Vendors that are submitting animals for sale and that have been previously tested are permitted to publish the result obtained at their discretion in this catalogue as homozygous (WW) or heterozygous (WH). Please note that where genetic testing results are included, that those results are an indication only and no form of guarantee or warranty is offered by the Vendor, Auctioneer, Ryeland Flock Book Society or Cardiff University for the accuracy of the result.
